1. INTRODUCTION

Colleges and Institutes Canada (CICan), in partnership with the Canadian Child Care Federation (CCCCF) and the Association des collèges et universités de la francophonie canadienne (ACUFC), invites qualified consultants or consulting teams to submit proposals to conduct a comprehensive Labour Market Information (LMI) study supporting the project Building a Strong, Mobile and Sustainable Early Childhood Education Workforce.

The successful consultant will provide labour market intelligence, workforce analysis, stakeholder engagement, and evidence-based recommendations to support workforce planning, labour mobility initiatives, occupational standards development, professional development programming, and recruitment and retention strategies within Canada's Early Childhood Education sector.

The resulting research will serve as a foundational input into subsequent project activities, including the development and validation of an updated National Occupational Standard (NOS), Prior Learning Assessment and Recognition (PLAR) resources, career navigation tools, and national microcredential development initiatives.

2. PROJECT BACKGROUND

Across Canada, governments are making significant investments in Early Learning and Child Care systems to improve affordability, accessibility, quality, and workforce sustainability. While these investments create opportunities for growth, they also highlight ongoing workforce challenges affecting employers, educators, learners, and families.

Many communities and regions continue to experience difficulties recruiting and retaining qualified Early Childhood Educators. Workforce shortages, demographic pressures, inconsistent qualification recognition processes, limited labour mobility mechanisms, and regional disparities in workforce supply continue to affect service delivery and long-term sector sustainability. At the same time, the workforce is evolving in response to:

- Changing employer expectations;
- Increasing inclusion requirements;
- Emerging pedagogical approaches;
- Growing demand for leadership and specialized competencies;
- New workforce development pathways.

Recognizing these realities, CICan, CCCC, and ACUFC are leading a national initiative funded through ESDC's Sectoral Workforce Solutions Program (SWSP) to promote recruitment, retention, labour mobility, and workforce sustainability within the ECE sector.
